THE NEW TURNER

MODEL SOD DYNAMIC
FOR TV - AM - FM
Recording • Broadcast
Public Address

SPECIFICATIONS

FREQUENCY RESPONSE: 50 to 15,000 c.p.s. flat within $\pm 2\frac{1}{2}$ db.
OUTPUT LEVEL: 56 db below 1 volt/dyne/sq. cm.
IMPEDANCE: 15, 200, 500 ohms or high impedance.
POLAR PATTERN: Essentially non-directional in any position.
MOUNTING: Ball and swivel type, tilts in any direction. Standard $\frac{1}{8}$ " — 27 thread.
CABLE: 20 ft., high quality rubber covered, two conductor shielded cable with Cannon quick-disconnect plug.

★ The crown jewel of dynamic microphones. See it, handle it — use it on highest quality recording, public address or broadcast work. New beauty, new styling, new utility and new performance make the Turner Aristocrat the finest of the fine. Use it anywhere, indoors or out — in hand, on stand, suspended, or concealed in stage settings. The Aristocrat is quickly and easily detached from ball swivel coupler for hand use. Non-directional polar pattern picks up sound from any direction. Equally effective for individual or group pickups with wide range, high fidelity reproduction of voice or music. Its high output dynamic generator requires no closely associated auxiliary equipment for outstanding results. Built of finest materials with flawless workmanship, each unit is laboratory calibrated to insure specification standards . . . Write for complete details.

BARGAINS!

• We still have plenty of them—but, we are doing so much business that we are afraid we won't have anything left to sell in a few months. Most of the material we have been advertising is still as usable—check with us for current prices.

WANTED!

• Right now we're more interested in buying than selling. We want to buy large or small quantities of new or used electronic component — equipment, tubes, etc., pay by mfr. surplus. Cash or trade for standard test equipment or electronic material of your choice.

NEW RCA WO-56A 7" OSCILLOSCOPE

Unequalled in Performance, Unmatched in Versatility! This new extremely sensitive RCA 7" Scope features DUAL CONTROLS for Coarse and Fine adjustments, Identical Vert. and Horiz. Amplifiers... for response flat down to DC... for measuring DC component in AC signal circuits. Push-Pull throughout, High Amplifier Output and Gain, Phase Angle. Advanced sweep facilities include preset fixed positions for TV vert. and horiz. waveforms, plus or minus sync for easy lock-in of upright or inverted pulse waveform, line-frequency sweep and sync, with phasing. Frequency Response of both amplifiers flat within —2 db from DC to 500 Kc. within —6 db at 1 Mc. useful beyond 2 Mc. Square wave response—no tilt and over-shoot. Both amplifiers have frequency-compensated and voltage-calibrated attenuators. Peak-to-peak calibrating voltage source.

TERRIFIC! RCA 51552 15" Duo-Cone SPEAKER

Engineers and professional sound technicians have nothing but praise for this sensational new RCA unit. A development of Dr. H. F. Olson, famous RCA speaker authority, it provides remarkable listening quality at a moderate price. Employs two voice coils, each driving one of the duo-cones, which vibrate as a single cone, at crossover frequencies (around 2,000 cps), avoiding "crossover" interference. Has high sensitivity at high power levels—will handle up to 25 watts. Delivers superb, high fidelity performance from 40 to 12,000 cps, over 60° angle. Requires no crossover network. Magnetic structure contains a bridge network to supply equal flux density to the air gap for each voice coil, from a 2 pound Alnico V magnet. 16 ohms impedance.
No. A33, RCA 51552 Speaker, Ship. Wt. 18 lbs. Net **\$48.50**

BUILD 15 RADIOS ONLY \$14⁷⁵

- Absolutely No Knowledge of Radio Necessary
- No Additional Parts Needed
- Excellent Background for Television

The PROGRESSIVE RADIO EDU-KIT will help you, if you want an EDUCATIONAL AND INTERESTING HOBBY, or if you want to get into a WELL-PAYING BUSINESS, or if you want to INCREASE YOUR KNOWLEDGE OF RADIO.

Absolutely no knowledge of radio is necessary. The PROGRESSIVE RADIO EDU-KIT is the product of many years of teaching and engineering experience. The detailed instructions and quizzes are clearly written and illustrated, so that they can be understood by anyone between the ages of 12 and 80.

The PROGRESSIVE RADIO EDU-KIT is not merely a collection of radio parts accompanied by a radio diagram. IT IS PRACTICALLY A RADIO COURSE, offered at a mere fraction of its real value. You will be taught to build radios in a progressive manner. First, you will build a very simple 1-tube receiver. The next set is a little more advanced. Gradually you will find yourself constructing elaborate radio sets, and doing work like a professional radio technician. Every part is illustrated. EVERY STEP INVOLVED IN BUILDING THESE SETS HAS BEEN CAREFULLY PLANNED. YOU CANNOT MAKE A MISTAKE.

Each of the 15 radios you will build operates on 110-120 volts, AC or DC. These sets have been designed to teach you the PRINCIPLES OF RADIO. Therefore, you will build a variety of circuits. The PROGRESSIVE RADIO EDU-KIT IS EXCELLENT FOR LEARNING THE PRINCIPLES OF RECEIVER, TRANSMITTER, AND AMPLIFIER DESIGN. It is used in many Radio Schools and Colleges in U.S.A. and abroad. It is used by the Veterans Administration for veteran training.

Quizzes are provided as part of the PROGRESSIVE RADIO EDU-KIT. They will be corrected by our staff at no extra cost.
